CAREER OBJECTIVE

Agricultural Science graduate with a specialization in Crop Protection and practical experience in farm operations, crop production, and livestock management. Passionate about integrating agronomic knowledge with digital agriculture, data tools, and technology-driven decision-making to enhance productivity, sustainability, and environmental management.

EDUCATION

Bachelor of Agriculture (Crop Protection) – Federal University of Agriculture, Abeokuta, Nigeria, 2017

- **Relevant coursework**:
  - Crop Production & Soil Management
  - Plant Science
  - Agricultural Economics
  - Animal Production
  - Agricultural Statistics
  - Environmental & Sustainable Agriculture

PROFESSIONAL EXPERIENCE

Head of Operations & Procurement - Relitorin International Incorporation, Nigeria (2019 – Present)

- Coordinated procurement and logistics for technical and operational projects
- Managed suppliers, contracts, and delivery timelines
- Oversaw operational planning, documentation, and reporting
- Supported technology-driven installations and services for institutional clients
- Developed skills in process optimization, data tracking, and operational efficiency
- Role involved remote monitoring, structured processes, and strict attention to detail.

PRACTICAL & FIELD EXPERIENCE

Farm Practical Training (Industrial Training) – Federal University of Agriculture, Abeokuta (2015 – 2016)

- Cultivated and managed crops under varying soil and climatic conditions
- Participated in land preparation, planting, irrigation, pest control, and harvesting
- Applied basic principles of sustainable agriculture and resource management
- Collected and recorded farm data for productivity assessment

---

TECHNICAL & DIGITAL SKILLS

- Excel: data tracking, reporting, and farm analytics
- Python: basic data handling and analysis
- Frontend development: HTML, CSS, JavaScript
- Linux & Windows: daily operational use, basic Bash scripting
- Cybersecurity awareness (completed ALX & Google programs)

PROJECTS

- GitHub repositories: https://github.com/highpee1991?tab=repositories – includes Python and web-based projects demonstrating applied digital skills in agriculture and technology
- E-commerce website: aafoodstore.com – project demonstrating practical application of web development and operational management skills

---

INTERESTS

- Precision and digital agriculture
- Sensor technologies for crop and soil monitoring
- Decision-support tools for farm management
- Sustainable land and environmental management

LANGUAGES

- English – Fluent
- Yoruba – Native
- Italian – Beginner (willing to learn)
